

## How can I tell what version of Internet Explorer I am running?

My.methodistcollege was designed to be viewed using Internet Explorer 7. However, it will work with most browsers.

1. Click the help menu at the top of your screen.  
(If your menu bar does not display, see below.)
2. Click "About Internet Explorer". Your version of Internet Explorer will display in a new window.
3. Click Ok to close this window.

If your menu bar does not display...

1. At the top of your screen, right-click the area under the address bar.
2. Click Menu Bar. The menu bar (File, Edit, Help etc.) should now display.
